Trusted by Safety Leaders and Teams Across Industries

The Challenge:

Incidents Go Unreported. Blind Spots Persist. Safety Suffers.

What You're Up Against

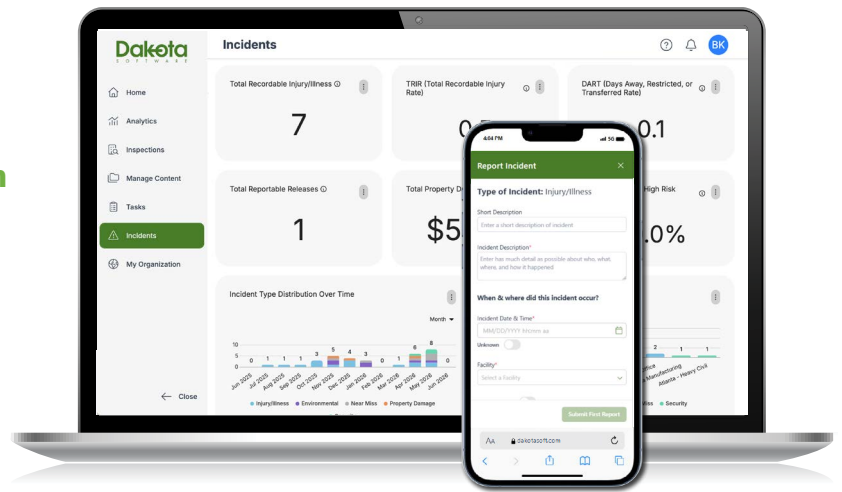

- ❗ Incidents go unreported or details get lost due to complicated or inconsistent processes
- ❗ Lack of structured reporting causes incomplete documentation and compliance gaps
- ❗ Investigations stall when the right people aren't notified or information isn't shared
- ❗ Safety leaders lack the visibility to identify trends and measure program performance

How Dakota Helps

- ✔ Simple, accessible reporting ensures issues are captured accurately from the start
- ✔ Forms are designed for complete and credible OSHA and EPA recordkeeping
- ✔ Configurable notifications and permissions drive collaboration and accountability
- ✔ Built-in analytics – including TRIR and DART – track enterprise-wide performance

A Smarter Path to Safety and Compliance

- 1 Capture Incidents and Observations**
Simple, accessible forms ensure key details are documented at first report for any type of incident, from any member of your workforce.
- 2 Investigate, Collaborate, and Take Action**
Configurable alerts, role-based access, and time-stamped event logs keep investigations moving from initial report to corrective action closure.
- 3 Measure and Improve Performance**
Built-in analytics and safety KPIs support trend analysis, performance measurement, and agency reporting requirements.

Key Benefits of Dakota's EHS Incident Solutions

Mobile-Friendly

Easily report injuries, near misses, environmental releases, and other events from any connected device.

Compliance-Ready Forms and Reports

OSHA 300, 300A, and other agency reports — generated automatically from your data.

Integrated Corrective Action Tracking

Assign and track from first report to closure, preventing recurring issues.

Configurable Alerts

Stay on top of new reports, Root Cause investigations, and follow-up activities with role-based notifications.

Security, Privacy, and Data Integrity

Role-based access and user activity logs safeguard data and support accountability.

Real-Time Analytics

Measure TRIR, DART, and other safety KPIs with built-in dashboards for analysis and agency reporting.

Who Uses Dakota's Incident Management Solutions

Corporate EHS Leaders

Gain visibility across all locations with real-time data and insights for smarter risk management.

Site Safety Managers

Monitor performance, streamline agency reporting, and promote a culture of safety engagement.

Frontline Workers

Simplified reporting supports an open communication loop and strong safety culture.

Ready to see it in action?

"Dakota is a one-stop-shop that allows our global workforce to report incidents centrally while simplifying data analysis and month-end reporting."

- Corporate Safety Manager, HBM
